She'd been a frightened, angry, and humiliated girl, panicked into flight. She would not ever be that and a woman. Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years. . . . would need the weapon. Fulmire didn't know which side how much of the Army is on. There could be fighting out there at any minute. You don't know what you'll be walking into." But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up..rhythmic and crisp, faint at first, then suddenly rhythmic and solid, like the whoosh of a sword cutting air; Next, the man grins at his reflection. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.
