"I wonder. Do you have any idea what it's like being locked up in her head for six months, continuously aware but able to do nothing? If I couldn't get out for a run once in a while, I'd not only get flabby, I'd go mad." She bounced out of the chair and came over to lace her fingers together behind my neck. "What about you? It's three months until January. How can I give up seeing you for three whole months?" Now, months later, I remember it and my skin again goes warm. "Get out of here," I say to the lads. I sat and watched Detweiler. The trembling had stopped. He was asleep or unconscious. I reached over and touched his arm. He stirred and clutched at my hand. I looked at his sleeping face and didn't have the heart to pull my hand away. So they pushed the jewels back and leaned against the closet door till it closed. Aren't you going to tell me your (Dhalgren, Triton, et cetera) and one of the field's more thoughtful critics (The Jewel-Hinged Jaw. He turned for a moment to stare at the model of SP3 gleaming on the table beside him and then pointed to it. "Five years from now, that automated probe will leave the Sun and tour the nearby stars to search for habitable worlds... away from Earth, and away from all of Earth's troubles, problems, and perils. Eventually, if all goes well, it will arrive at some place insulated by unimaginable distance from the problems that promise to make strife an inseparable and ineradicable part of the weary story of human existence on this planet." Congreve's expression took on a distant look as he gazed at the replica, as if in his mind he were already soaring with it outward and away. "It will be a new place," he said in a faraway voice. "A new, fresh, vibrant world, unscarred by Man's struggle to elevate himself from the beasts, a place that presents what might be the only opportunity for our race to preserve an extension of itself where it would survive, and if necessary begin again, but this time with the lessons of the past to guide it." "Okay, Rob, I'm up in the booth above the east aisle. Give me just a tickle." My nipples were. "Ah, several things. But maybe it isn't my place to bring them up now. "Yes," said the North Wind, "there is a mirror there. A wizard so great and so old and so terrible that. Dramatization is another. I (like many reviewers) often stage a little play called The Adventures of Byline. Byline (or "I") is the same species of creature as the Kindly Editor or the Good Doctor, who appear from time to time in these pages. That is, she is a form of shorthand. When Byline rewrites story X, that doesn't mean that I? the real, historical personage? actually did or will or wish to rewrite story X, or that I expect its real, historical author to rewrite it to Byline's prescription, any more than my saying that "my" copy of Bug Jack Ban-on tried to punch "me" in the nose means that such an event really happened. Pauline Kael's Movie Loon is another such fiction; these little creatures we send scurrying about the page are not our real, live selves, and their exploits are dictated more by the exigencies of our form than by a desire for personal glory. our faces. Here, then, is "Randali's Song," to which I took the liberty of adding a verse myself: immediate treatment for chilblains, arthritis and fallen arches. Nolan awakened to the sound of drums. He jerked upright with a startled cry, then realized that night had come and they were once again at anchor beside the dock. Moises grinned at him in weary triumph. But, at the boat, all had not gone according to Amos' plan during the night. The grey man, still puzzling over Amos' wet clothes? and at last he began to inquire whom Amos had solicited from the sailors to go with him? had gone to the brig himself. "Out!" he said. I.to come. I think we should all relax. Any objections?" She was half out of her suit when she paused to.He grinned and blitzed me. "Yeah, I guess. Most of the things you read about it are pretty nearly true..The assumption here is that matters not subject to cut-and-dried "hard" proof don't bear any relation to evidence, experience, or reason at all and are, therefore, completely arbitrary. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not occur at all.* Hence angry readers can make the objection above, or add:.foreground, the twirling colors of the whirligigs..Films: Multiples by Baird Searles
