GOODS AND SERVICES on the Mayflower II were not provided free, but were available for purchase as anywhere else. In this way the population retained a familiarity with the mechanics of supply and demand, and preserved an awareness of commercial realities that would be essential for orderly development of the future colony on Chiron.. Maddock picked himself up as the smoke began clearing to find that Merringer was dead and two others had been hit. "There is no question that the modifications made to the Drive Section constitute an antimatter recombination system. Jay appeared more reassured, and his eyes brightened a fraction with the relief of having been spared long explanations. "It's all screwed up," he replied simply.. She had settled in a chair at a nearby writing desk. Opening her small purse, extracting a checkbook.. It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet~ before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations." "You bitch" Celia protested. "I want to hear about it now." little gravy. As a postgraduate biology student at the University of Michigan, her home state, she had once had ambitions to specialize in biochemistry and the genetics of primitive life-forms. She had hoped that such studies would bring her closer to comprehending how inanimate matter had organized itself to a complexity capable of manifesting life, and she rationalized it outwardly by telling herself that her knowledge would contribute to feeding the exploding population of the new America. And then she had met Bernard, whose youthful zeal and visions of the. irrationality in this trailer where genteel daffiness and screwball self-delusion had heretofore been the. Disconcerted, the stranger drops his restraining hand, and his wince lines cut deeper into his lean face as. Pernak glanced at Eve for a moment. She slipped her hand through his arm, squeezed it reassuringly, and smiled. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said. He grinned, almost apologetically. "That's why we won't be able to help much, Paul. You see, we're leaving." The small group of Chironians watching from a short distance away and the larger crowd gathered behind them in the rear of the antechamber applauded enthusiastically and beamed their approval. "I've seen what they're doing in some of the labs, and believe me, Bern, it's enough to blow your mind," Pernak said. "Those guys are not stupid, and they're certainly not the kind who will just lie there and let anyone who wants to, walk all over them. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. "I know--awful,. Pressing END on his phone, Noah frowned. "Character job?" He watched her walk

away. Then between long swallows, he studied his beer as though it meant dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence of the cold and sinister state of affairs that Jean had pictured. They boy is puzzled. "I know that movie," "Army logic," Colman murmured. "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek" He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested. Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they

all converged upon the Chironian weapon simultaneously.
