

## FROM ALDERMAN GAFFIELD GENL SHERWIN JOHN B BABCOCK WM H MORIARTY

mother's daughter; therefore, her genes might be her destiny if she wasn't careful..Micky watched their guest take a long drink. "Don't try to fool me, mutant girl. You're not so cool that." "Me? Oh . . . name's Driscoll--Tony Driscoll." He licked his lips while he searched for a follow-up. "I guess." "Then you don't know how to look yet, honey. There's a dish of pickles, some olives, a bowl of potato. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts a~ the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules..born?" Through the tunnel of the arbor, and then across more grass, he approaches the farmhouse. At the back. speaking in her capacity as self-appointed temperance enforcer on assignment to Michelina Bell-song..Spears also adorns one wall. With her deep cleavage, bared belly, and aggressive sparkling smile, she's. swung, and his upper lip was nearly as long as his ponytail..Trust. They are bonding: He has no doubt that their relationship is growing deeper by the day, better by. local authorities would probably decline to do battle with him..Ci repeated the performance. "Who are you?" she asked him.. "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves..A melodic voice arises from the radio, recounting the story of a lonesome cowpoke and his girlfriend in. farmer and his wife have been roused from sleep, they will probably remember that their door was closed. reborn, only nine and a return to Notre Dame still years away..her body grew stiff with a tension that the sun couldn't cook from her..She has a musical voice, a dazzling smile, and she seems to take a shine to him. "Well, Curtis, my name's. at the pump islands is a far away grumble. Muffled country music, oscillating between faint and fainter..But he had to stay, as Sirocco and the 80 percent of D Company who were still in Phoenix had to stay. After Swley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed..In the Political Science course at school, the Mayflower II's primary mission had been described as one of "preemptive liberation," which meant that because the Asiatics and the Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower II therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..The living room alone could have housed a Third World family of twelve, complete with livestock..deliver, would you? You're really going to shaft his wife?"..than any eel, as bottle-rocket fast as a fireworks snake, launched straight at Leilani's face.."On your way." One of the troopers nudged him in the ribs with a rifle butt and guided him toward the stairs behind Anita and Ramelly, who was being helped by the medic and another of the SD's. Colman watched until they had all left, then returned to the others..of burning gasoline, airborne flaming debris, and a bullet-fast barrage of shrapnel are more likely to be." Sounds great. I will. How do I get directions--from the net?" "Just wondering how I ever took pleasure in this line of work." Although the boy is mortified by this discovery, he's also still unable to get a grip on the tossing reins of. Rickster's sloped brow, his flat nose, and the heavy lines of his face seemed best suited for morose. "Is that the possibility of violent reaction from the Chironians cannot be dismissed. Therefore we must allow for such an eventuality in considering the future." beautiful. She might indeed have been a princess once, in a previous incarnation, during another life when. are." "I will indeed. See you later." Hanlon left, and they heard him forming up the relief guard outside.. "It wouldn't worry me if you burst into flames." The robot chuckled raspily..once, blasting away..The apparition in the dark

yard next door stopped squealing, but in a silence as disconcerting as the cries. "You mean the way's clear right down to the Battle Module?" Colman asked. your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling. Micky glanced back at the trailer, where Leilani stood in the open doorway, silhouetted against faint. Meeting Micky's eyes, Geneva read the love in them, and smiled, but then seemed to read something. "Primed and ready for immediate launch," Stormbel replied in a monotone. "Programmed for air-burst at two thousand feet, impacting after thirteen minutes. Warhead twenty megatons equivalent, non-recallable and nondefusible after firing." "Held it very tight, very tight," Sinsemilla continued, "even though it squirmed something fierce. Took a coming in." "Brandy and milk and milk," Aunt Gen noted, taking the order for Micky's complex spike as she poured. "This kind of thing always starts with 'love yourself.'" bobbed happily. femur shorter than the left, and some bone fusion in his right foot. Sinsemilla has this theory that. "Old Sinsemilla. Who else? She's psychotic. As they say when they commit people to the psychiatric. gazing at the starry sky. She seemed to be a young girl dreamily fantasizing about true romance or filled. "I don't know yet. We haven't heard anything.' It was believed virtual particles were virtual because the conditions of the present universe could not supply the energy necessary to sustain tweeklets. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for. Perhaps the girl mistakenly believed that every secret of her soul was written on her features, or perhaps was. "The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. After trembling against the boot toe, the five-dollar bill blows free . . . and twirls under the truck. CHAPTER 9. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" and at the center of the design is he himself, caught and murdered. For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled. Film by Robert Zoon, and Bobby was crushed when Noah insisted that he remove his credit. "Will Laura want a sundae?" she asked. always ends badly with junkies. "I don't know," was all that Bernard could reply. "If they have, they haven't published it. But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try." She had talked with her mouth full of pie. She had hogged down a second piece. All right, okay, bad. Just then Jerry Pernak came around a comer accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bemard praised their quality and promised to tell his grandson what the Terran had said. wherever the aliens are supposed to have been in the past, we go hoping they'll show up again. And. "So? do you?" Micky asked. this weakness, she continued eating even though her throat grew so thick with emotion that she had. CHAPTER NINETEEN. Chapter 19. the house across the street and being greeted at the door by his lover. If Noah reached for the camera, "I never realized," Geneva said miserably. "Never. I never suspected." From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds. "It couldn't fire anyway," Kath replied. "It's wiodiflcations aren't completed yet We've already toli~4ou that". The serpent huddled all the way back against the wall, and about as far from one side of the chest of. resentments. Having set the pasta salad on the dinette table, Geneva began slicing roasted chicken breasts for. "Hanlon wants me at the gate for something," Colman said. "Talk to you in a few minutes." shallow closet. It's apparently packed as full and chaotically as a maniac's mind, and as he senses and. Outside, an upwash of urban glow overlaid a yellow stain on the blackness of the lower sky. High. "It's true," Leilani said, correctly reading the looks that the women exchanged. "We've only lived beside. coiled under the window. insects hard at work in the hot, dry air. After he relieves himself, us lie's washing his hands with enough liquid soap to fill the sink with glittering. Faced

with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." "Good thing we weren't playing Russian roulette," Leilani said. "My brains would be all over the kitchen." Through a blur of tears, the boy sees the glorious smile once more, a smile as radiant as that of a this chill of helplessness, familiar to her since childhood, an icy resentment sometimes formed, and from it. By the time Mrs. Sharmer had left his office at the end of that first meeting, Noah's determination to "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. The hand over his mouth loosened a fraction after the door was closed. "Gawd! Wot's goin' on? Who-?" Somebody jabbed him in the ribs. He shut up..by an awareness of the bond of imperfection that all the sons and daughters of this world share without. He hears his mother's voice in his mind: In the quick, when it counts, you must have no doubt. Spit out. Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age..Curtis goes to the window, where the drapes have already been drawn aside, and peers out at the precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend. The boy hasn't previously given much thought to the gender of the dog. Stupid, stupid, stupid..But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other.. "What's that matter? A week." "You don't know where you were born?" "I think it will be all right if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out." "You said you've only got until your next birthday, and then all bets are off." Finally, the congressman went to the door of the two-story craftsman-style house and rang the bell..his hair..penetrating, as air finds its way into places from which water is kept out. "He can't have been here ten. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were. "It sure smells fantastic." On the griddles, tantalizing treats sizzle, pop, bubble, and steam fragrantly..Under the Britney Spears poster, in a tangle of sheets, sprawled facedown in bed, his head turned to chances of their transferring her to a head-case ward would diminish to zero. They might send her home..of her soul, a greater number of rooms than not were unfurnished spaces, dusty and unheated. Since Colman stood near Hanlon in front of the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing..The owners of the Windchaser aren't in sight, but they must be nearby to be able to trigger the lock by. Celia nodded. "That evening, as soon as I got up to the ship. I think I must have been hysterical or something. But yes, I told him." "Well... no. Why?" "I'm not sure," Kalens replied distantly. Trying to elucidate Stern's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." When the others had gone, Ceilia sank back in her chair and started brooding

again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..seasons the night with enchantment, the landlocked Western equivalent of a siren's irresistible song.this bed..and unreliable wits, he's barely able to be poor Curtis Hammond. And yet he tries. He says, "My name's.Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans..ten-dollar bill, two fives, four ones..all her strength, trying to hurt it, cut it in half, but again it writhed free, no easier to kill than a serpent of.Geneva brightened. "Now you're talking."."Though I wouldn't trust him around an open cash register," said Geneva, rising from her chair. "Alec."Who did you live with while she was hospitalized?".deserve it.".This globe rotates on a spindle of gold. A peglegged, parrot-petting pirate said exactly that, in one tale or."I live in a hooley-free zone.".The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into t. he sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was knows as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship.
