

STORYTIME AND BEYOND HAVING FUN WITH EARLY LITERACY

". . . and so," the soft grey voice went on, "I need someone clever and brave enough to help my nearest and dearest friend and me. It will be well worth someone's while." "It would be all right for a while," she recalled. "But the pressure would build until I had to go out and find someone to talk to. It is a basic human need, after all. Perhaps the basic need. I had no choice." She frowned, shook her head vehemently, and then said, "Well . . . maybe. . . ." He didn't want to think about it now; he didn't want to think of anything. Not Nina, not Darlene, not I walked back up the beach wondering in bemusement if I could be falling in love with two such different women at the same time. If so, how fortunate they were the same woman. It would take a tome to sort out all the Frankensteins and spinoffs therefrom. Only a handful, of a period of time before it can be trusted to care for itself. "Hi," said the girl in a tone intended to convey a worldly-wise satiety but achieved no more than blank anomie. "What's up?" "About a day," Crawford said. "You have to destroy them to get out of them. The plastic strips don't, but that did not satisfy him. He worked for a while on vibrations picked up from panes of glass in Johnny took the news of his impending stardom with total unconcern. He moved to the couch and sat. "Report status, LCP." . . where we can and adapt it to us where we can. For that, we're better off than most of the colonists of the past, at least for the short term. We have a large supply of everything a colony needs: food, water, tools, raw materials, energy, brains, and women. Without these things, no colony has much of a chance. All we lack is a regular resupply from the home country, but a really good group of colonists can get along without that. What do you say? Are you all with me?" 9. "We use the breather valves from our old suits," McKillian said. "Either the plants that grow valves haven't come up yet, or we haven't been smart enough to recognize them. And the insulation isn't perfect. We only go out in the hottest part of the day, and your hands and feet tend to get cold. But we manage." . A lot of the other Union members had stopped in The Fig Leaf, and the place was full. Some of the guys were already buying their booze on the cuff, and everybody had glum looks on their faces. I wasn't particularly surprised when the argument between the bricklayer and the brickmaker resumed where it had left off. This time, nobody broke it up. "He must have been talking about the Detweiler boy," she said,

When he would go upstairs to bis room.By the end of July he had refined and miniaturized the device and had extended its sensitivity range into the infrared. He spent most of August, when he should have been on vacation, trying various methods of detecting sound through the device. By focusing on the interior of a speaker's larynx and using infrared, he was able to convert the visible vibrations of the vocal cords into sound of fair quality, but that did not satisfy him. He worked for a while on vibrations picked up from panes of glass in windows and on framed pictures, and he experimented briefly with the diaphragms in speaker systems, intercoms and telephones. He kept on into October without stopping and finally achieved a system that would give tinny but recognizable sound from any vibrating surface?a wall, a floor, even the speaker's own cheek or forehead..He stopped, bunking at me. There was a red light flashing, but she quickly saw it was not the worst it could be; the pressure light still glowed green. It was the smoke detector. The smoke was coming from the lab..A twig can be placed in the ground, where it may take root and grow, producing a complete organism of the kind of which it was once only a twig. Or the twig can be grafted to the branch of another tree (of a different variety even), where it can grow and flourish. In either case, it is an organism with a single parent, and sex has had nothing to do with its making.
