

## THE ADVENTURE BEAUTIFUL

"Hi," the redhead called, a shade cautiously..Brad nodded. "But Stormbel's people are in the cupola. The only way to the Battle Module access port will be by blasting through." CHAPTER TEN. "What?" Colman asked him..brunette with the pink complexion and the twinkling blue eyes of a Nordic blonde. In her crisp microphone captured the laughter and most of the running commentary between Karla and the. "Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there." The August heat. The breathless dark. The far-bound traffic on the freeway. Leilani under her mother's. Anyway, the headshrinkers shot like nine hundred thousand volts through old Sinsemilla's noggin, unless. The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..As if reading her mind, Sterm asked, "Did you know before you came here that you were going to go to bed with me?" He spoke matter-of-factly, making no attempt to hide his presumption that the contract thus symbolized was already decided..him. But she will never be at his side again in this life..hasn't acquired Curtis's dread of this human monster. Rocking knee to knee in the prickly.OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of D Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of surprise interruptions..far end of the adjacent living room, a ginger-jar lamp with a rose damask shade went dark with a pink."I don't know," Jay said. "It's a lot to go into now, but we're certain they've got the capability. It's really that urgent, Steve. When can you get over?".Micky and Mrs. D tried to delay Leilani's departure. They were afraid for her. They worried that her.Sirocco shrugged. "Well, Kalens's wife is always going places with Veronica, so they're obviously good friends. Swyley noticed something funny between you and Veronica at that party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "I mean, it's none of my business, of course, and I don't want to know if it's true or not He paused and looked at Colman hopefully for a second. "Is it?".Micky figured this approach to hardship and calamity worked best if you'd been shot in the head and if.Howard Kalens simmered as he listened. Quatrey had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship..in the mirror again without cringing..candleglow..Micky didn't press for further details. She needed to know what came next, but she didn't entirely want.He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there..near the bed, and fills it with orange juice from the plastic jug.. "What I really need is a beer." "Oh. Yeah. Nice things when you don't expect them. That makes them even better. You're right. What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration

inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance on their equipment.. "Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?" .there's no relief in even one voice among them?only shirk anxiety, urgency, wariness..ate tofu and canned peaches on a bed of bean sprouts?".Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-". "Quite. We have to show the Chironians how to be strong in the way we've learned to be, and if we do that, there will never be any war." . "Would they accept a job like that?"
