can fly up, fly up into the Courts of the King. Come along, come along, up into his tower, where."I have thought some about it," said the boy, in his husky voice.. "So?" said the Namer, more drily..voice spoke in his mind, stronger and clearer than Gelluk's voice and spells. Through her eyes and.Highdrake took Medra as his student, gratefully. "I was taught my art by a mage who gave me freely all he knew, but I never found anybody to give that knowledge to, until you came," he told Medra. "The young men come to me and they say, "What good is it? Can you find gold?" they say. "Can you teach me how to make stones into diamonds? Can you give me a sword that will kill a dragon? What's the use of talking about the balance of things? There's no profit in it," they say. No profit!" And the old man railed on about the folly of the young and the evils of modern times..only place for him was the Great Port, the King's City, and for all he cared the island of Way.He stood there a long time before he went down through the high grasses and the sparkweed. At the foot of the hill he came into a lane. It led him through farmlands that looked well kept, though very lonesome. He looked for a lane or path leading to the town, but there never was one that went eastward. Not a soul was in the fields, some of which were newly ploughed. No dog barked as he went by. Only at a crossroads an old donkey grazing a stony pasture came over to the wooden fence and leaned its head out, craving company. Medra stopped to stroke the grey-brown, bony face. A city man and a saltwater man, he knew little of farms and their animals, but he thought the donkey looked at him kindly..And they talked about that, all the wise women of the island: what was the true art of magic, and where did it turn false; how the balance of things was kept or lost; what crafts were needful, which useful, which dangerous; why some people had one gift but not another, and whether you could learn an art you had no native gift for. In such discussions they worked out the names that ever since have been given to the masteries: finding, weather-working, changing, healing, summoning, patterning, naming, and the crafts of illusion, and the knowledge of the songs. Those are the arts of the Masters of Roke even now, though the Chanter took the Finder's place when finding came to be considered a merely useful craft unworthy of a mage..in his bluish eyes was like the soft, crazy shift of quicksilver. "The womb?".knowledge. Then Rose feared her, and feared for her..be trivial. He disliked the old man for that, and because he was unshakable. He never praised."Mercy," whispered Gift. "He.As he left the battlefield it began to rain, and he saw his enemy's true name written in raindrops in the dust..biologist can explain it to you.".where the man was he betook himself there very quickly, on eagle's wings; for Early was a great.BUT OF COURSE he went down to Havnor South Port, in one of his father's carts driven by one of his father's carters, along with Master Hemlock. As a rule, people do what wizards advise them to do. And it is no small honor to be invited by a wizard to be his student or apprentice. Hemlock, who had won his staff on Roke, was used to having boys come to him begging to be tested and, if they had the gift for it, taught. He was a little curious about this boy whose cheerful good manners hid some reluctance or self-doubt. It was the father's idea, not the boy's, that he was gifted. That was unusual, though perhaps not so unusual among the wealthy as among common folk. At any rate he came with a very good prenticing fee paid beforehand in gold and ivory. If he had the makings of a wizard Hemlock would train him, and if he had, as Hemlock suspected, a mere childish flair, then he'd be sent home with what remained of his fee. Hemlock was an honest, upright, humorless, scholarly wizard with little interest in feelings or ideas. His gift was for names. "The art begins and ends in naming," he said, which indeed is true, although there may be a good deal between the beginning and the end..cattle, fattening beef for the populous southern coast, letting the animals stray for miles across.After a while Ayo said, "She went down to Firn with some of the young folk. To buy fleece from the shepherds there. A year ago last spring. That wizard they spoke of came there, casting spells. Taking slaves.".The people of the Archipelago speak Hardic. There are as many dialects as there are islands, but none so extreme as to be wholly unintelligible to the others..hmn. They know I love him. She looked up.no mark of distinction but only a barrier to communication, to the simplest exchange of words,."He knows that, sister," Mead told her. "Didn't he tell us he was a ship carpenter? But it's a terrible long way down to the sea, surely. With this wizard on your scent, how are you to go there?".as it was under the Kings.."Do it.".boy Otter, except Otter's mother and father and sister, if they were still alive. And surely there.dead, the blind girl who knew the names of things. He told them his trick, and the blind girl.The witch said nothing.."But outside Roke," said Medra, "there are common people who slave and starve and die in misery..She was in his charge, in his care, he had known that when he saw her. Though she came to destroy Roke, as she had said, he must serve her. He did so willingly. She had walked with him in the forest, tall, awkward, fearless; she had put aside the thorny arms of brambles with her big, careful hand. Her eyes, amber brown like the water of the Thwilburn in shadow, had looked at everything; she had listened; she had been still. He wanted to protect her and knew he could not. He had given her a little warmth when she was cold. He had nothing else to give her. Where she must go she would go. She did not understand danger. She had no wisdom but her innocence, no amour but her anger. Who are you, Irian? he said to her, watching her crouched there like an animal locked in its muteness..he was

ten years old. He had been afraid of them, the women that shouted at him to get out of the.knew why he had never sought reconciliation with his father.. "Why should I do that?". "That would be only what the women of the Hand call it, keeping its meaning from the wizards and the pirates. To them no doubt it would bear some other name.". The people of Osskil, Rogma, and Borth are lighter-skinned than others in the Archipelago, and often have brown or even blond hair and light eyes; the men are often bearded. Their language and some of their beliefs are closer to Kargish than to Hardic. These far Northerners probably descend from Kargs who, after settling the four great Eastern lands, sailed back to the West about two thousand years ago.. "I don't understand.". When he was on Orrimy, Medra had learned to read the common writing of the Archipelago. Later, Highdrake of Pendor had taught him some of the runes of power. That was known lore. What Ember had learned alone in the Immanent Grove was not known to any but those with whom she shared her knowledge. She lived all summer under the eaves of the Grove, having no more than a box to keep the mice and wood rats from her small store of food, a shelter of branches, and a cook fire near a stream that came out of the woods to join the little river running down to the bay, Medra camped nearby. He did not know what Ember wanted of him; he hoped she meant to teach him, to begin to answer his questions about the Grove. But she said nothing, and he was shy and cautious, fearing to intrude on her solitude, which daunted him as did the strangeness of the Grove itself. The second day he was there, she told him to come with her and led him very far into the wood. They walked for hours in silence. In the summer midday the woods were silent. No bird sang. The leaves did not stir. The aisles of the trees were endlessly different and all the same. He did not know when they turned back, but he knew they had walked farther than the shores of Roke..Clearly, what I had devised, and the way, too, that I went before them to argue for an.The Patterner pushed four pebbles into a little curve on the sand and said, "I wish the Sparrowhawk had not gone. I wish I could read what the shadows write. But all I can hear the leaves say is change, change... Everything will change but them." He looked up into the trees again with that yearning look. The sun was setting; he stood up, bade her goodnight gently, and walked away, entering under the trees..over the time when Roke first became the Isle of the Wise, and it may be that the wise men put it.underground. He did not understand why the ceiling was low and the air smelt fresh but sour and cattle were bawling outside. He had to lie still and come back to this other place and this other man, whose use-name he couldn't remember, though he had said it last night to a heifer or a woman. He knew his true name but it was no good here, wherever here was, or anywhere. There had been black roads and dropping slopes and a vast green land lying down before him cut with rivers, shining with waters. A cold wind blowing. The reeds had whistled, and the young cow had led him through the stream, and Emer had opened the door. He had known her name as soon as he saw her. But he must use some other name. He must not call her by her name. He must remember what name he had told her to call him. He must not be Irioth, though he was Irioth. Maybe in time he would be another man. No; that was wrong; he must be this man. This man's legs ached and his feet hurt. But it was a good bed, a feather bed, warm, and he need not get out of it yet.
