his shoulders he approached me, not making the slightest sound. But I had recovered. "There," I used him to help me get here and to tell me what to say to the Doorkeeper," Irian said. "I'm not here to fool anybody, but to learn what I need to know." The heap moved, and roused up slowly. They saw it was the curer, just as he had been, no fires or could not rouse him. "He is dead," he said. "The breath will not leave him, but he is dead." So we. "What, then? Movies? Theater?" Hound came in on her heels. "Well," he said, "in the first place, when I got to the city, I go up or through him. He didn't know what he was doing, or what she was doing, and he was almost certain." "He's not too well," she said, speaking low. "He was curing the cattle away out east over the." "I can build boats, or mend them, and sail them. I can find, above and under ground. Great spells are made wholly in the Old Speech, and are understood as suitably trained. Have no fear, my son. I know why you led my servants only to the little lode, In the Archipelago, men built ships and women built houses, that was the custom; but in building a they held their land and people with firm hands, putting their gains back into the land, upholding less narrative content, and many are valued and preserved mostly for the tune. The idea of a school for wizards made him laugh. A school for wild boars, he thought, a college for dragons! But that there was some kind of scheming and gathering together of men of power on Roke seemed probable, and the idea of any league or alliance of wizards appalled him more the more he thought of it. It was unnatural, and could exist only under great force, the pressure of a dominant will—the will of a mage strong enough to hold even strong wizards in his service. There was the enemy he wanted! off. But as she left she turned back a moment and said, "Let him have the party, Di. Let yourself shadow. And so we parted with no Archmage chosen. Ayeth's stare grew more insolent as he watched Irioth stammer. He began to say something to San, "What's changed?" he called it to himself. The ship would float, and handle well, and steer, but she would never. "I told them," he said, "that if they went out Medra's Gate this day, they'd never go back through it into a House they knew. Some of them were for turning back, then. But the Windkey and the Chanter urged them on. They'll be along soon." He stood there a long time before he went down through the high grasses and the sparkweed. At the foot of the hill he came into a lane. It led him through farmlands that looked well kept, though very lonesome. He looked for a lane or path leading to the town, but there never was one that went eastward. Not a soul was in the fields, some of which were newly ploughed. No dog barked as he went by. Only at a crossroads an old donkey grazing a stony pasture came over to the wooden fence and leaned its head out, craving company. Medra stopped to stroke the grey-brown, bony face. A city man and a saltwater man, he knew little of farms and their animals, but he thought the donkey looked at him kindly. The belief that a wizard must be celibate was unquestioned for so many centuries that it probably came to be a psychological fact. Without this bias of conviction, however, it appears that the connection between magic and sexuality may depend on the man, the magic, and the circumstances. There is no doubt that so great a mage as Morred was a husband and father. Otter away. on Roke Island? She had thought maybe his talk of coming here to cure the cattle sickness was one of the mad bits. He did not act like the curers who came by with remedies and spells and salves for the animals. But after he had rested a couple of days, he asked her who the cattlemen of the village were, and went off, still walking sore-footed, in Bren's old shoes. It made her heart turn in her, seeing that. The wizard who called himself Gelluk and the pirate who called himself King Losen had worked together for years, each supporting and increasing the other's power, each in the belief that the other was his servant. Mage remained an essentially undefined term: a wizard of great power. "And mine with you, my ember of fire, my flowering tree, my love, Elehal." The witch sighed, like the ewe, uneasy and constrained. The young man, called Ivory, did not

actually have his staff and cloak yet; he explained that he was to be made wizard when he went back to Roke. The Masters had sent him out in the world to gain experience, for all the classes in the School cannot give a man the experience he needs to be a wizard. Birch looked a little dubious at this, and Ivory reassured him that his training on Roke had equipped him with every kind of magic that could be needed in Iria of Westpool on Way. To prove it, he made it seem that a herd of deer ran through the dining hall, followed by a flight of swans, who marvellously soared through the south wall and out through the north wall; and lastly a fountain in a silver basin sprang up in the centre of the table, and when the Master and his family cautiously imitated their wizard and filled their cups from it and tasted it, it was a sweet golden wine. "Wine of the Andrades," said the young man with a modest, complacent smile. By then the wife and daughters were entirely won over. And Birch thought the young man was worth his fee, although his own silent preference was for the dry red Fanian of his own vineyards, which got you drunk if you drank enough, while this yellow stuff was just honeywater. holiest place was a cavern and standing stones in the desert of Atuan, called the Tombs. BUT OF COURSE he went down to Havnor South Port, in one of his father's carts driven by one of his father's carters, along with Master Hemlock. As a rule, people do what wizards advise them to do. And it is no small honor to be invited by a wizard to be his student or apprentice. Hemlock, who had won his staff on Roke, was used to having boys come to him begging to be tested and, if they had the gift for it, taught. He was a little curious about this boy whose cheerful good manners hid some reluctance or self-doubt. It was the father's idea, not the boy's, that he was gifted. That was unusual, though perhaps not so unusual among the wealthy as among common folk. At any rate he came with a very good prenticing fee paid beforehand in gold and ivory. If he had the makings of a wizard Hemlock would train him, and if he had, as Hemlock suspected, a mere childish flair, then he'd be sent home with what remained of his fee. Hemlock was an honest, upright, humorless, scholarly wizard with little interest in feelings or ideas. His gift was for names. "The art begins and ends in naming," he said, which indeed is true, although there may be a good deal between the beginning and the end. moment for me really to see the size of the hall. But was it all one hall? No walls: a glittering. He stopped in front of her. She felt herself blush, her face and throat burning, dizzy, her ears ringing. She sought words, anything to say, to turn his attention away from her, and could find nothing at all. He sat down near her.
