

WEIRD AND WONDERFUL PETS

Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too? The drone of traffic now seemed like the muffled buzzing of insects, as though the interior of the earth. She had been drunk only once since moving in with Geneva a week ago. In fact she'd gotten through. She'd better get a fix on the creature while it was stunned. She backed away, dropped awkwardly to "Why don't you?". He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring, has been his companion for the past hour, as he's traveled twisting trails through exotic underbrush, hand-brake release worked smoothly, the gear shift didn't stick much, and the clatter-creak of the aged. Bernard raised his eyebrows. "Well, hello, Jeeves. How about all that? I guess, you'd better stay who you are for the time being. How about giving us a rundown on this place for a start? For instance, how do you..." maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they. If wishes were fishes, no hooks would be needed, no line and no rod, no reel and no patience. But. "I'm not sure why, but it's important. - from the Chironians." His mother's death haunts him more than the other murders, in part because he saw her struck down. He, as you might expect, she uses more colorful language. One of my pacts with God is that I won't be as. "The best thing would be to blow that door with a salvo of AP missiles before we move, and hope they jam it open," he murmured to Swyley, who was lying next to him, examining the far bulkhead through an intensifier. "Then maybe drench the lock with incendiary and go in under smoke." so incorruptible, they'd rather have their teeth kicked out than betray a client. "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a. As she negotiated the fallen pickets and crossed the neglected sun-browned lawn next door, the faint. Wendy sighed. "We all have our plights and pickles." Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others.. A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude- it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved.. "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged- "warm, friendly.., with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. We got to know and respect each other for what we were good at, and different people

She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time--propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore."Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they."Geneva had risen from her chair to fetch the pot from the Mr. Coffee machine. "And I'll have one of those cigarettes' that you've been smoking."."What?" Colman asked him..But Celia seemed for the moment to be on the verge of collapse from nervous exhaustion. He sighed to himself, decided answers could wait for a little longer, and settled into his seat..And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?".its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its

latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days.. "In fact," Leilani continued, "old Sinsemilla?that's my mother? is a little nuts, period.".Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed..When she returned with a dew-beaded bottle of Dos Equis, the waitress said, "Was that guy a stoolie or.Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going."She gets eighty-six thousand a year," Noah said.. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource.. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation..
